Your README is part of the interview

For take-home assignments, the repo story matters.

Why it matters

A hiring manager may only have a few minutes before the interview. They may read the README before the code.

Show the work

Explain the assignment, product scope, data sources, safety boundaries, and how to run the project.

Show engineering

List tests, evals, monitoring, known limitations, and next improvements.

Be honest

If code was AI-generated, say what you reviewed, what remains weak, and how you would improve it.
