

Alexey Grigorev

Workshop: Module 3

Coding Agent Capabilities: MCP, Skills,
Plugins, and Custom Agents | August 17,
2026 at 5:00 AM PDT

What this covers

How modern coding agents are extended and customized.

Why it matters

A coding agent becomes more useful when it has the right instructions, tools, permissions, and repeatable workflows.

Main workflow

Use project instructions to guide agents inside a repository. Connect assistants to tools, context, and actions with MCP.

What you will leave with

Review agent output with tests, diffs, and human judgment.
