

Alexey Grigorev

Workshop: Module 4

Open-Source AI Tools for Security, Audit, and
DevOps | August 18, 2026 at 5:00 AM PDT

What this covers

How to use open-source AI tools around security, audit, and DevOps workflows.

Why it matters

AI-assisted projects still need security scanning, audit trails, incident investigation, and deployment discipline.

Main workflow

Use AI around pull request audit and review.
Connect security scanning to AI-assisted workflows.

What you will leave with

Keep humans, policy, and audit trails in the loop.
