

Alexey Grigorev

Practical workflow: Pre-course Q&A

A practical note for AI Dev Tools Zoomcamp
2026 Pre-Course Live Q&A

The problem

Before joining a cohort, it helps to know the workload, prerequisites, project expectations, and how to get unstuck.

Control 1

You should be comfortable with basic programming, Git, GitHub, and the command line.

Control 2

You do not need a GPU or previous AI tools experience.

Control 3

The course focuses on planning, coding, review, testing, agents, security, DevOps, and a final project.
